PIPING COMPONENTS

www.technifor.com
Technifor has developed a wide range of stand-alone, integrable and mobile solutions to mark permanently any components for recreational and commercial marine, transport vessels, workboats, military ships...

Traceability improves quality control

Easy and flexible identification solutions
Mark on components during production process for internal identification & overall traceability. Mark on final products for end-user easy identification.
Mark on large parts even in the harshest working environments.
Mark any information: identification number, DataMatrix™ code, serial number, date code, text, technical characteristics, certification symbol, measured values, conformity standards, logos, class symbol (DNV, GL, CCS, R5, GL, BV...) & construction marks.

Legible & indelible marks, resistant against any weather condition
- Identify any part: engines, transmission, exhaust, propulsion, fuel & hydraulic systems, trailers, safety equipment, interior parts, pipes, metal structures & rigging, nameplates, ID tags...
- Mark any material: steel, die cast aluminium, plastic... Any surface: raw, cast, machined, smooth...

Our markings comply with all international standards.

Integrate our expertise in your production process

- Consistent high quality marks in very fast cycle times: meet increased production needs.
- Flexible solutions to fit any production process: mobile, automated, semi-automated...
- Communicate with your central server, database, measuring machine, barcode scanner...
- Robust and reliable solutions to operate in rugged environments

Marking system and software
Reading systems
On-site installation and training
Local technical support
Full manufacturer’s warranty

Our benefits

- Meet traceability standards
- Provide high quality permanent marks
- Avoid human errors, lost or mixed paperwork
- Ease of installation and operation
- High output and minimum downtime
